

Class AdvLabel

Inheritance

↳ System.Object
↳ StatusMark (Recycle.UserControls.StatusMark.html)
↳ StatusLabel (Recycle.UserControls.StatusLabel.html)
↳ AdvLabel

Inherited Members

StatusLabel.TextProperty (Recycle.UserControls.StatusLabel.html#Recycle_UserControls_StatusLabel_TextProperty)
StatusLabel.Text (Recycle.UserControls.StatusLabel.html#Recycle_UserControls_StatusLabel_Text)
StatusMark.StatusProperty
(Recycle.UserControls.StatusMark.html#Recycle_UserControls_StatusMark_StatusProperty)
StatusMark.Status (Recycle.UserControls.StatusMark.html#Recycle_UserControls_StatusMark_Status)

Namespace: Recycle.UserControls (Recycle.UserControls.html)

Assembly: Recycle.dll

Syntax

```
public class AdvLabel : StatusLabel
```

Fields

DescriptionProperty

Declaration

```
public static readonly DependencyProperty DescriptionProperty
```

Field Value

Type	Description
DependencyProperty	

ParameterKeyProperty

Declaration

```
public static readonly DependencyProperty ParameterKeyProperty
```

Field Value

Type	Description
DependencyProperty	

Properties

Description

Declaration

```
public object Description { get; set; }
```

Property Value

Type	Description
System.Object	

Methods

GetParameterKey(DependencyObject)

Declaration

```
public static string GetParameterKey(DependencyObject obj)
```

Parameters

Type	Name	Description
DependencyObject	<i>obj</i>	

Returns

Type	Description
System.String	

SetParameterKey(DependencyObject, Object)

Declaration

```
public static void SetParameterKey(DependencyObject obj, object value)
```

Parameters

Type	Name	Description
DependencyObject	<i>obj</i>	
System.Object	<i>value</i>
